

**FERROPLAN**

**Pallet Master**

# **Reliability – *not just a* buzzword**

## ***Pioneer of floor-level pallet handling***

- *improves working conditions*
- *reduces the risk of accidents*
- *reduces the amount of forklift traffic in the working environment*
- *product family for EUR, INDUSTRIAL , CHEP and ½ pallets*

## ***Ferroplan – The Best Solution***

Ferro Conveyor solutions

## ***Pallet Master, pneumatically operated***

Fully automated loading and unloading operation at floor level.  
Compressed air supply and a 230 V electrical socket required.  
Capacity 15 or 25 pallets.

## ***Pallet Master, electrically operated***

Fully automated loading and unloading operation at floor level.  
Quick operation for just loading or unloading also possible.  
A 230 V electrical socket is all that is required.  
Capacity 15 or 25 pallets.

## ***Pallet Master, 1-5 electrically operated***

1-5 pallets can be taken to the machine at the same time for automatic stacking or, conversely, 1-5 pallets can be taken off the machine at the same time at floor level.  
Capacity 15 or 25 pallets.

Fully automated loading and unloading operation at floor level.  
Quick operation for just loading or unloading also possible.  
A 230 V electrical socket is all that is required.  
Capacity 15 power pallets.

## ***Pallet Master for 1/2 pallets, electrically operated***

***Pallet Master may also be integrated with conveyors and used with a palletising cell, for example.***

## ***Accessories, special colours***

***Standard colour dark grey RAL 7024 with red side walls RAL 3020.***

- The machine can be easily customised by painting the side walls and guard fence accessories with the desired colour.
- Guard fences and overfill sensor available for 15-pallet machines.
- Electrically operated machines can be placed in a cold, covered space with the help of a cold-weather installation kit.
- Modular design makes customisation for special pallets easy.
