

ABS Vertical Ladder Rail

Vertical safety rail for fixed ladders

Our high-quality ABS Vertical Ladder Rail lets you work on an aluminium or steel fixed ladder without encountering any problems and means that you can enjoy maximum safety. The user is reliably secured in the event of a fall thanks to our guided type fall arresters, which are equipped with special locking mechanisms. Each fall arrester secures 1 individual, a total of 2 individuals can use the system at any one time.

Our ABS Vertical Ladder Rail lets you cover any distance from the ground without any restrictions. A particularly useful feature of our ABS Vertical Ladder Rail is that you can climb off sideways onto a platform. You can easily get on and off whenever you want so that you can work at intermediate points or at different levels. As the system revolves around being flexible and adaptable, you can make optimum use of it in a variety of different environments.

In addition, our ABS Vertical Ladder Rail system is equipped with foldaway resting platforms. These allow you to rest safely whilst on the way up and to take a break without having to leave the ladder. Whether you are carrying out maintenance work, inspections or any other activities, our Vertical Ladder Rail offers you all the safety you need whilst working high up.

- EN 353-1:2018
